PRINCIPAL MESSAGE

Prof. Uttam B. Jadhav (Principal)

[M. Tech. Computer Science Engineering]

Dear friends!

We welcome you to SND Polytechnic, to an intensified time of informed quest. We believe that the path to success lies in accepting challenge as opportunities for growth. Our institution inculcates the journey of hard work and diligence among st its students enabling them to overcome obstacles in the journey of their future lives with dignity and poise. The essential quality developed in an engineering diploma at SND Polytechnic is to possess the ability for effective problem-solving. Also, the softer but crucial aspects of engineering are "character" or "attitude" building. Development mind-set for holistic, systemic thinking and recognizing skills for administration; all these in addition to the conventional inputs towards development of analytic, rational skills.

I am also proud of the great team we have in the institute.

In the short span time SND Polytechnic has strived not only to give the best engineering education to our students under some of the most erudite and well-respected faculty, but also to integrate their knowledge in excellently equipped laboratories, through individual project, and by sending them out for interactive field work in industries during their higher semesters. The academic professionalism the members of faculty demonstrate is remarkable. I sincerely look forward to the day we meet.
